Foreword

Metin Aslantaş

Partner
Technology, Media and Telecommunications
(TMT) Industry Leader
Deloitte Turkey

Fast 50 program is Deloitte's commitment to a new generation of corporations that will shape the future of business. As such, we take great pride in identifying the fastest growing technology companies in Turkey whom we believe contribute greatly to the digital transformation of the Turkish industries. Our Technology Fast 50 program is a great means to do not only just that, but also celebrate the entire technology ecosystem for its productivity and creativity.

Witnessing the striking performance of both new and returning winners strengthens our belief that there will soon be technology firms among the globally renowned Turkish brands. We feel privileged for putting the spotlight on them, as we have been doing for the lastthirteen years.

Similar to last year's winners, this year firms from software sector dominates the list. Whilst, the leading subsector was commerce-advertising-adtech last year, this year Enterprise Software segment tops the list. Significantly, the existence of Security, SaaS/Cloud, Data analytics, and AI segments shows that Turkey follows global technology industry trends.

The importance of investing in R&D not to be driven out of competition can clearly be seen that year as well. Fast 50 winners have increased their R&D spendings almost 30% in comparison to 2016. Especially, Media & Entertainment and Software subsectors' R&D spendings has increased more than 100%.

We believe technology firms will become the cornerstone of the re-emergence of the Turkish economy in the following years. Perseverance, appetite to invest and flexibility to adapt will be major factors in achieving even more growth.

I would like to take this opportunity to extend our sincere gratitude and appreciation to our long-lasting partners MOBİLSİAD, ÖDED, TBD, TBV, TESİD, TTGV, TUBİSAD and YASAD whom exerted great efforts for the realization of the program. They have been great support in my first year as the leader in this program.

Once again with great pleasure, I present you the 50 fastest growing technology companies of Turkey.

Technology Fast 50 Turkey Program

The program celebrates Turkey's fastest-growing high-technology companies. The awards identify the trends that are shaping the technology, media and telecommunications sectors today. Based on revenue growth percentage over a four year period, the program includes companies from all related industry sub-sectors:

- Communications
- Environmental Technology
- Fintech
- Hardware
- Healthcare and Life sciences
- Media and Entertainment
- Software

To be eligible for Deloitte Technology Fast 50 Program, companies must meet the following criteria:

- to be a technology company which:
 - has its own proprietary technology that contributes to a significant portion of the company's operating revenues
 - manufactures a technology-related product devotes a significant effort to research and development about technology
 - be technology insentive, or use unique technology to solve problems
- to be in business for a minimum of four years
- whose parent company must be Turkish owned and headquartered in Turkey
- whose operating revenues must be at least €50,000 for 2014 and €1,000,000 in 2017.

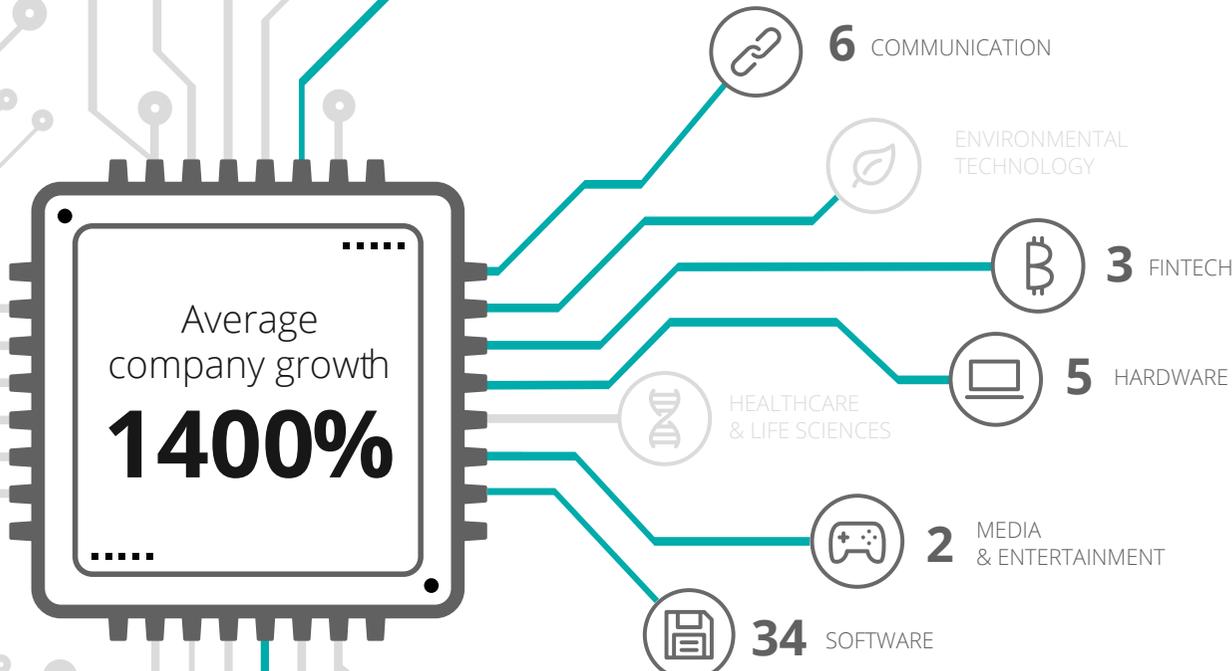

Deloitte Technology Fast 50 Program is part of Deloitte's global Fast 500 program which runs simultaneously in countries such as USA, Canada, United Kingdom, France, Norway, Sweden, The Netherlands, Germany, Central Europe, Israel, South Africa, China, Australia, Hong Kong, India, Japan, Korea, Malaysia, New Zealand, Singapore, Taiwan, Thailand, South Korea and Finland.

Benefits of Participating at Technology Fast 50 Program:

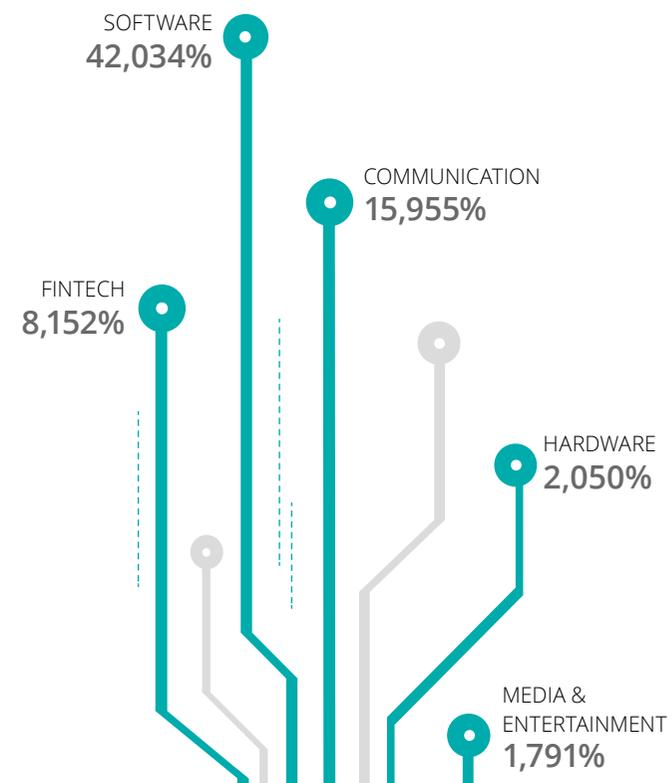

Technology Fast 50 winners receive exposure and recognition upon release of the rankings from both the media and business communities. The benefits are significant:

- Networking opportunity with other fast-growth Turkish technology companies and business organizations at our awards ceremony
- Networking opportunity with other fast-growth technology companies and business organizations from around the world through Deloitte Technology Fast 500 EMEA Program
- Access to leading edge industry research and commentary
- Recognition from the business and financial communities
- Benchmarking opportunity with similar companies
- Increased attention from the business and investment communities
- Media coverage

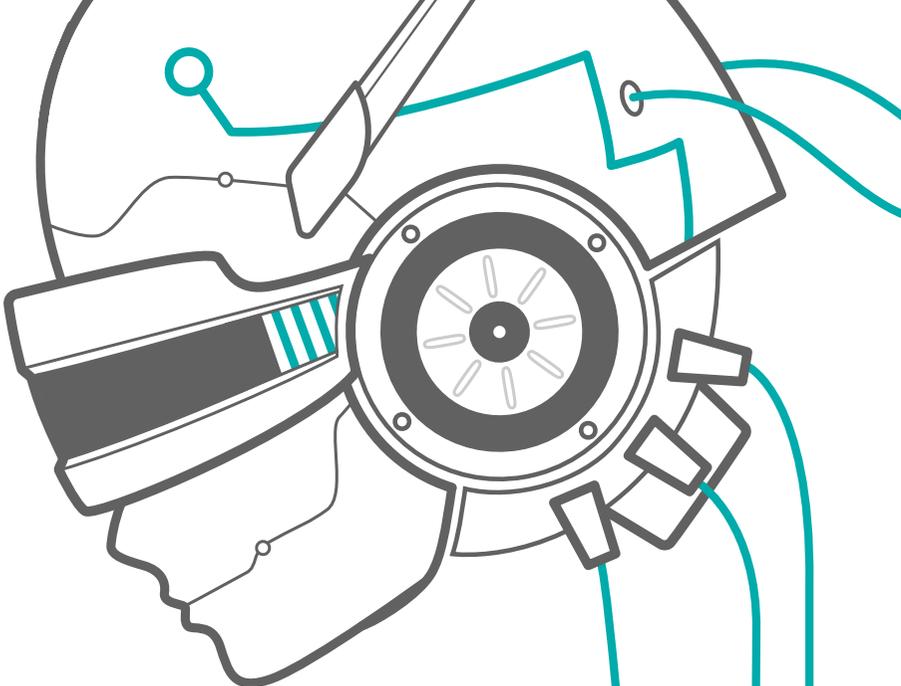

Companies broken down by industry segments:

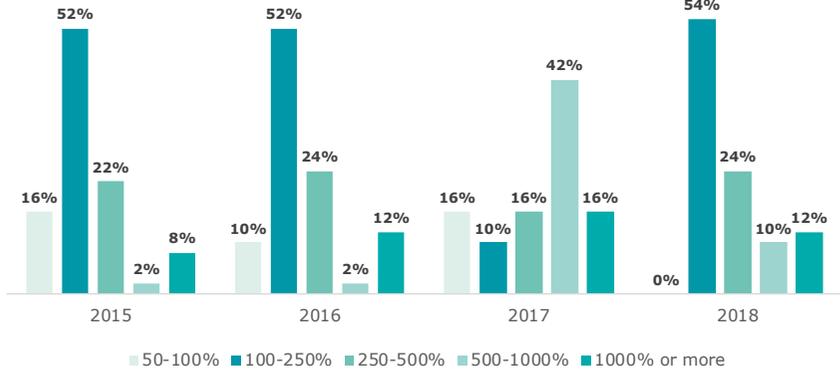

2018 total sectoral growth:

Geographic distribution

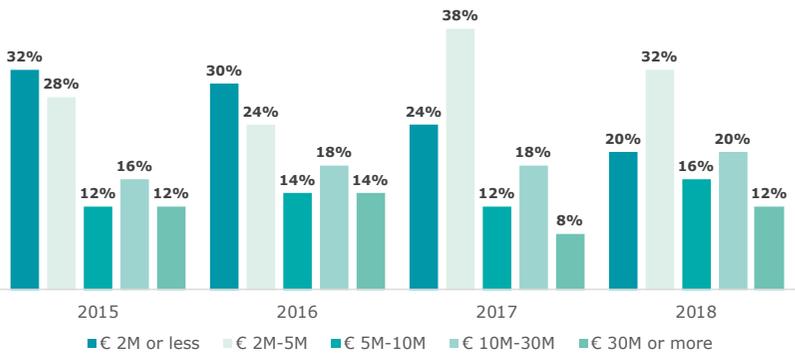

Growth Rate

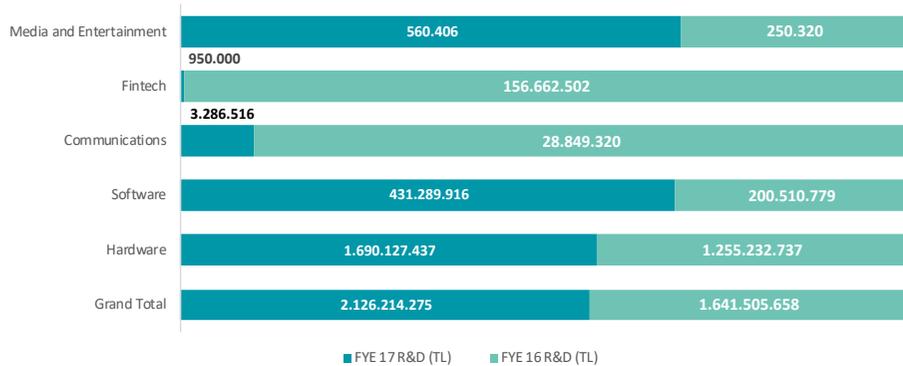

The growth rate of 2018 Fast 50 firms resembles that of 2016 winners. The majority of the firms accumulated between 100-250% growth rate. However, different than the previous years this year companies that grew between 50-100% could not enter the list.

Revenue

Last year, revenue-wise the majority of Fast 50 companies concentrated between the last 2 segments : € 2M or less and € 2M-3M. The revenue of this year's winners exhibit a similar pattern though with a total of 10% increase in the upper echelon can be seen in spite of the continuing decline of Turkish Lira.

R&D Spendings

It was often regarded that 2017 was a tough year, yet the importance of investing in R&D not to be driven out of competition can clearly be seen that year as well. Fast 50 winners have increased their R&D spendings almost 30% in comparison to 2016. The only 2 sectors that do not show this pattern, however Fintech and Communications subsectors. Other than those two there is significant increase in R&D spendings of winners. It is also noteworthy to mention that for Hardware sector, Aselsan's existence makes the real difference. For 2017, Aselsan's R&D budget is TRY1,674,543,328 which corresponds to 99% of the whole sector. (The figures are given in TRY to be able to nullify the volatility of currency and Aselsan is coded as operating under Hardware to make a similar comparison to last year)

aselsan

ASELSAN, the leading defense company of Turkey, is a high technology, multi-product company that designs, develops and produces genuine products reflecting edge technologies to meet the requirements of Armed Forces and Public Security Entities.

ASELSAN provides its customers with high-tech system solutions for land, airborne, naval and aerospace applications in the fields of Modernization Solutions for All Platforms, Military Communications, Radar, Electronic Warfare, Electro-Optic, Navigation & Avionics, Weapon, C4ISR, Naval, Homeland Security and Traffic & Toll Collection Systems.

ASELSAN, with the firm belief that "a country's technological wealth is composed of the various technologies in its possession", allocates about 6% of its yearly turnover to R&D projects, which it finances through its own resources.

For the last 12 years, ASELSAN sustained its position in the world as being in the list of top 100 defense companies. Our objective is to become one of the top 50 companies in the world through the development of original and national opportunities and talents of the highest level.

Being the main solution provider for the Turkish Armed Forces, ASELSAN also sustains its competitiveness in the international arena, with its export to 63 countries and active participation in NATO and other international joint research/development and production programs. ASELSAN has become one of the significant members of global defense industry in terms of revenue and technological advancements.

Technology Fast 50 Turkey 2018 Big Star Award

Ali Emir Eren
CEO, Innova

Innova IT Solutions A.S. is one of Turkey's leading IT solutions firms, with a team of 1411 professionals with experience of working with a wide range of technologies. Since 1999, Innova has been providing platform-free solutions to the public sector and private companies, particularly those operating in the telecommunications, finance, manufacturing and service sectors. It has exported its solutions to 37 countries in four continents and adheres fully to the standards of the ISO 9001:2000 certification.

Innova's activities include the provision of telecommunications industry software, ERP, CRM, BI applications, portals, custom software, information technology management systems, security solutions and kiosk systems. In 2007, Innova joined the Turk Telekom group of companies. It operates from its main offices in Istanbul and Ankara as well as its support centres in Izmir, Antalya, Adana, Erzurum, Diyarbakir, Kayseri, Trabzon, Samsun and Bursa.

LOGO

LOGO has been developing corporate software focusing on the increase of productivity and profitability of companies for 34 years, and has adopted a fair, transparent and contemporary management approach. More than 1,000 employees, 800 business partners and 200,000 companies have joined along in this journey of growth, thereby creating a solid foundation for sustainable success. LOGO boasts a huge and dynamic ecosystem, which encompasses users, academicians, students and sector professionals.

The company provides application software solutions to organizations of different scale, from micro businesses to large corporations. LOGO has long been the industry leader in terms of the number of customers, and offers an array of solutions including Enterprise Resource Planning along with numerous complementary products such as Client Relationship Management, Human Resources Management, Workflow/ Process Management, Supply Chain Management and Business Analytics.

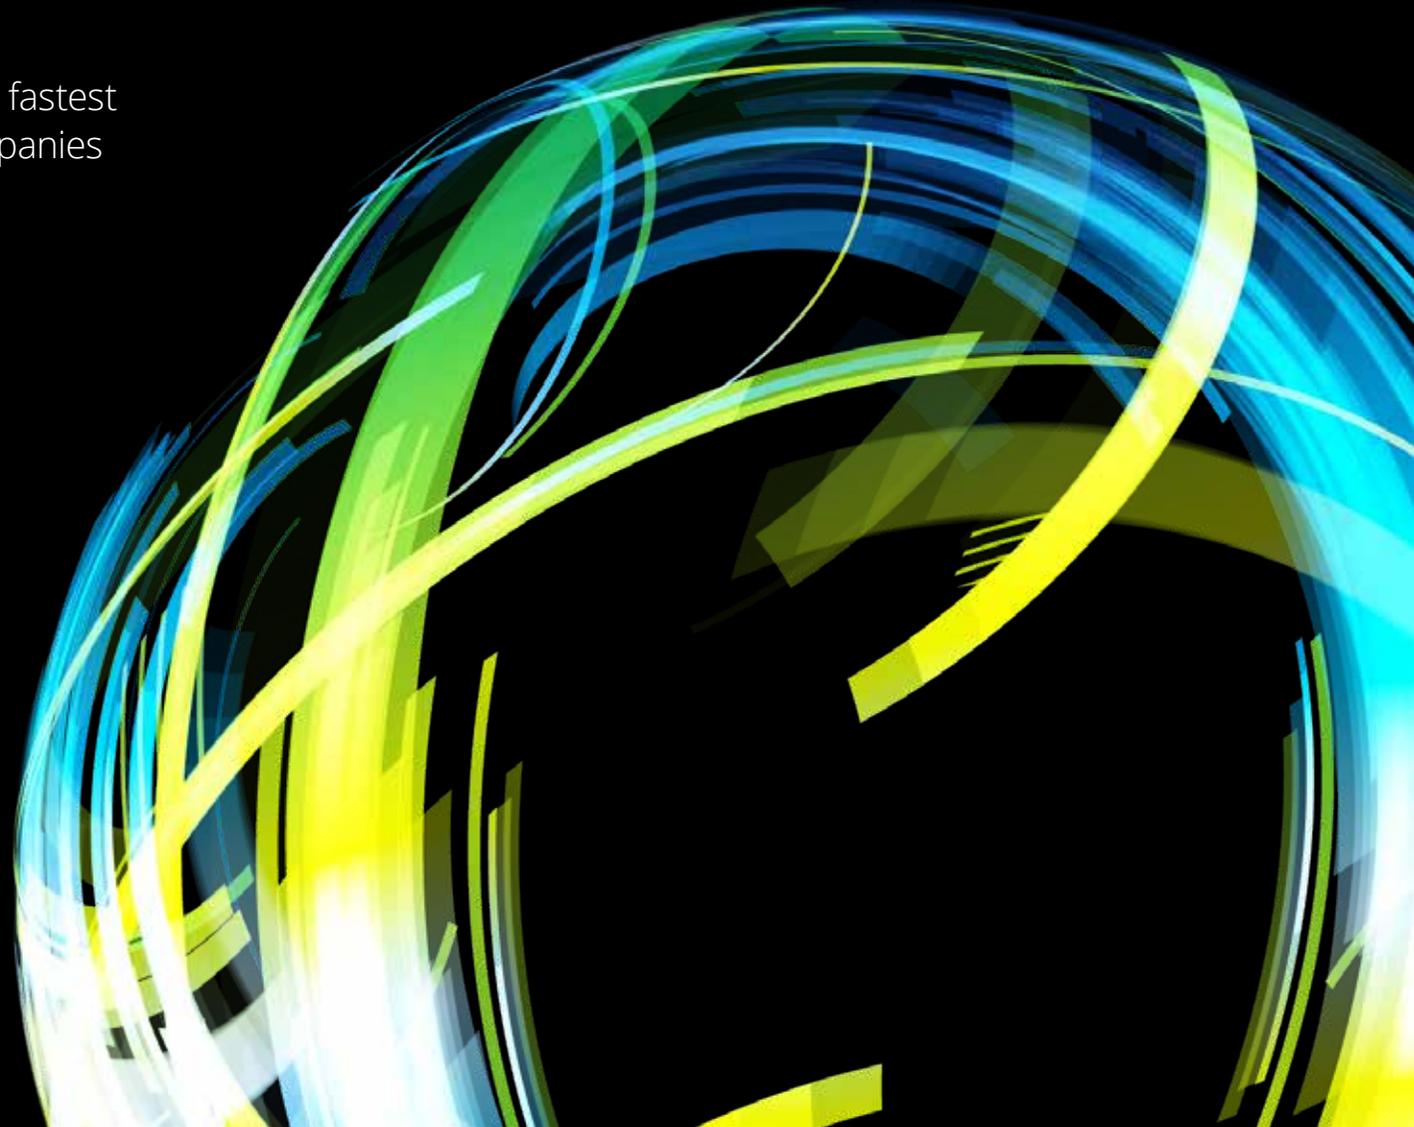

LOGO was the first-ever software company in Turkey to go public in May 2000. With a 61.3% free-float, the company ranks among the Top-5 companies at the BIST-100 Index in terms of the largest free-float rate.

In line with the goal of becoming a regional power, LOGO acquired TotalSoft, the leading enterprise applications software company in Romania, in 2016. Furthermore, Logo Infosoft was established to operate in India, as a joint venture with GSF Software Labs LLC. LOGO has continued a consistent pace of growth with an average annual revenue growth of 41% during the last five years. In 2017, total net sales rose by 35% to reach 256.2 million TL as a result of a double-digit revenue growth in all product categories. Net income totaled 50.8 million TL corresponding to a 12% growth. The share of R&D expenses in total invoiced revenues reached 45%.

The affiliates of LOGO in Turkey include eLogo, the most preferred digital transformation solutions partner in Turkey; FiGO, a commercial transaction platform established by Logo and Foriba; and LOGO Ventures, the private equity investment fund in Turkey focusing on technology investments.

Technology Special Award

Technology Special Award is presented to the fastest growing company among Fast 50 Turkey companies that managed to make the shortlist 3 times consecutively.

hype

Hype: Hype is a data-driven marketing agency that uses the latest available products and its own technology to meet the clients' sales and marketing goals. Hype provides services on data analysis, conversion rate optimization, performance marketing, and search engine optimization. Our technologies consist of Incognito, Predi, and Alerty.

Incognito is a business intelligence tool we built to assess a particular brand's search engine performance - both organic and paid. It calculates a search engine visibility score based on the number of keywords a domain ranks for, search volumes and rankings of those keywords. This makes it possible to compare different domains or see how they performed in the past. There are also pre-defined industries where you can evaluate how a domain performed in that particular industry.

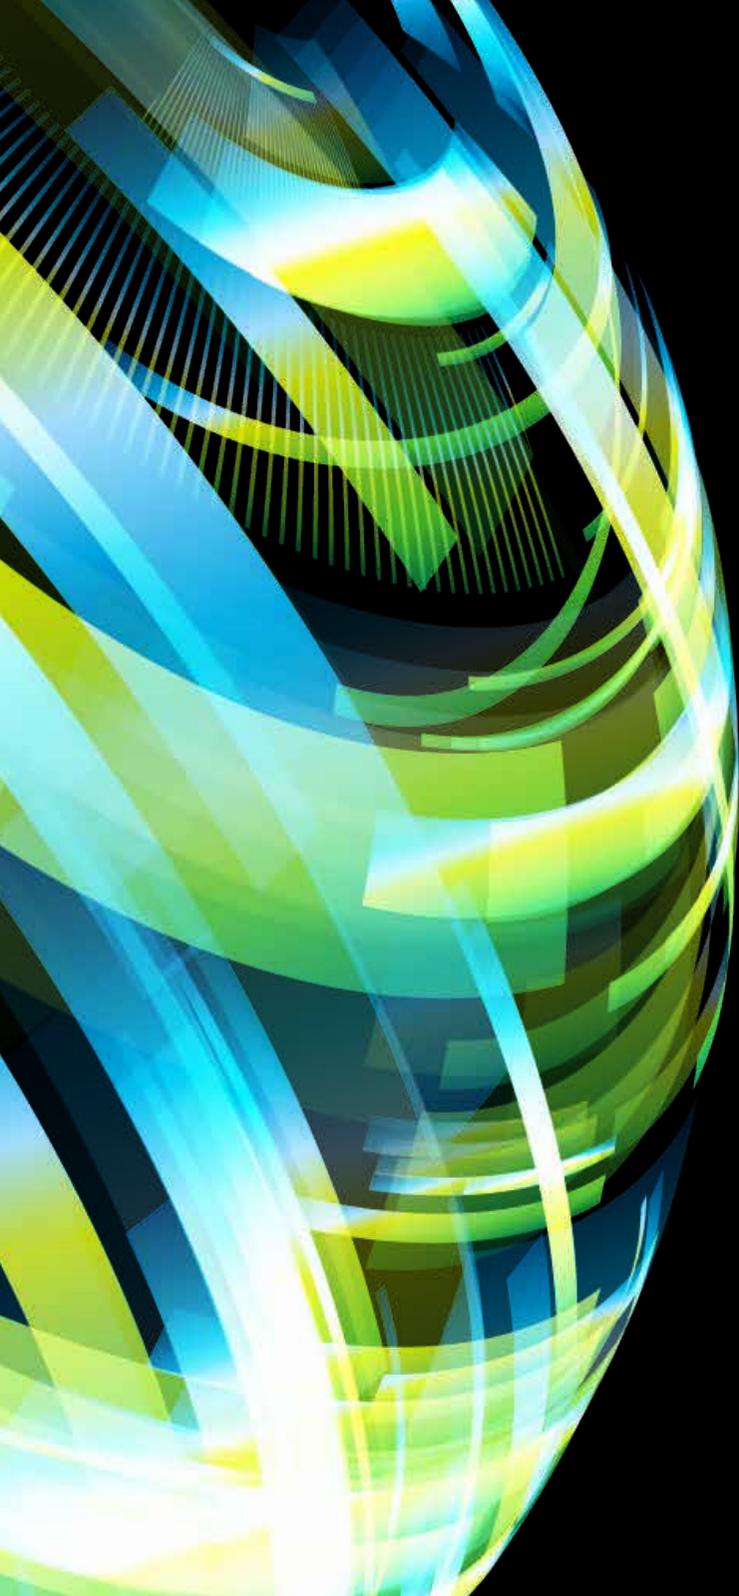

Predi is a forecasting tool for Google Analytics and AdWords. Predi analyzes main trends such as mobile device distribution, organic traffic volume or category seasonality and uncover the direction of the client's business with the power of data on Predi with just a couple clicks.

Alerty is our latest in-house developed tool that detects data anomalies in real-time. For the given set of metrics, Alerty constantly tracks the data. After comparing it to the previous periods, it lets us know instantly if there is anything out of the ordinary so that we can act on it.

iyzico: iyzico provides a secure payment solution to online companies, market places, and personal sellers of different sizes operating in different industries. Its technology enables over 17.000 online businesses to maximize conversion rates and accept payments while creating value added solutions for digital commerce not only for the Turkish market but also for exports. iyzico offers a premium product in terms of the quality service. Merchants who use iyzico are supported by real people, in real places, who can provide real support. It differs to competitors in that:

It's simple - in the past, Turkish merchants had to wait between four and six weeks before they could start accepting payments. With iyzico, merchants now only need to wait 24 hours.

It's seamless – iyzico is egalitarian. It offers the exact same service to all merchants, irrespective of size and only takes money at the point of merchants' transactions, making the process frictionless for clients and ensuring there is no burden on the merchant.

It's secure – iyzico uses its own machine-learning and AI to detect and prevent potential fraudsters by orchestrating an ensemble of engines with complementary capabilities for perfecting decision accuracy and speed. iyzico was one of the first businesses in Turkey to apply in-house AI to its systems, which has increased detection of fraud and increase conversion rates while minimizing cost of chargebacks. With its simple, seamless and secure technology iyzico is now the fastest growing fintech company.

Pixery: Pixery (formerly known as AVCR) is a global tech company building innovative video focused apps for next generation mobile creatives. With two R&D offices in İstanbul & Ankara and a satellite office in San Francisco, Pixery is a team of 25 people developing tools used by millions of people.

Pixery's first app Funimate is the fastest and easiest way to make awesome music videos with never before seen effects. Using a groundbreaking tech, Funimate packs capabilities earlier only possible in complex video editing software, in a very responsive and playful app. Funimate was featured by Apple as a "Best New App", selected among "Best of 2016" and "Editor's Choice" by Google.

Impresso is the easiest way to create video ads for social media. Featuring more than hundred video templates suitable for every occasion, creating a professional looking video is a breeze. Impresso was featured by Apple at its launch and was recently featured at the "Today's Picks" globally.

Usishi: Usishi is a software technology company driven by a team who develops Unix based systems over 20 years. It creates fast, clean and easy to use systems with intelligence in mind. Company name is founded by this principle. "US" and "ISHI" is a composition of two by interconnected words. "US" means intelligence and mind in Turkish. "ISHI" means the Job (as Turkish word "İş"). Company is invested on Cloud Technologies. Usishi developed a cloud platform Buluthan which means superior of cloud services in Turkish. Buluthan provides many layers of cloud technologies such as IaaS, PaaS, SaaS and DaaS.

Company's well-known flagship product Buluthan VDI (Virtual Desktop Infrastructure) has gained many successful implementations. Most important one is a defense institution which supervises national defense projects. Buluthan VDI provides 7x24, super-fast desktop services for more than 20.000 of users.

Other significant technologies company developed are Buluthan SM and Buluthan PS. Buluthan SM (Storage Manager) is high performance and reliable unified storage. It scales tens of petabytes with bit level data protection, 7x24 system uptime and built in secure disaster recovery facilities. Buluthan PS (Personal Space) is an in-corporate personal data storage and sharing service. It can be accessed securely from any device including personal mobile and tablet devices. Company is located in a nation strategic location, Istanbul Teknopark which is supervised by National Defense Ministry. Usishi's Buluthan is one of the nation strategic project approved by local authorities.

otelz.com: Established in 2013 in Istanbul, Otelz.com has grown from start-up to one of the largest travel e-commerce companies in Turkey. Otelz.com, a Sanko Group brand, provides online booking service to the users for over nine thousand properties from Turkey and North Cyprus. In addition to hotel chains and properties, Otelz.com offers many accommodation alternatives like hostels and boutique hotels. With its user friendly design Otelz.com shows many information that the users need from room prices to the location, from service and facilities to the availability status at one listing.

Each day, more than 10.000 room nights are reserved on our platform. So whether travelling for business or leisure, customers can instantly book their ideal accommodation quickly and easily with Otelz.com, without sharing their credit card information. Via our experienced call center; our customers can reach Otelz.com 24/7 for assistance and support any time of the day or night.

Providing service in Turkish language for now, Otelz.com website and mobile apps will be enriched with different language options in the upcoming period with extended accommodation options.

Armut: Armut.com was founded in 2011 with a mission of making it easy to find trusted service providers online in Turkey.

Since its foundation, Armut has strongly focused on developing a unique algorithm to build trust between providers and customers. By continuously focusing on service quality and customer satisfaction, Armut gained a dominant leader position in Turkish market after beating out its better-funded competitors, and achieved 98% customer satisfaction.

Between 2014 and 2017, Armut managed to achieve very impressive financial and non-financial results;

- Received over 150.000 monthly job requests
- Reached over 1.4 million new customers
- In addition to its success in Turkey, launched in five countries in 2017 and plans to launch in new countries in current year.
- As a part of expansion plan launched a new brand, Rahattaşın first vertically integrated marketplace solution for moving sector in Turkey, in 2017

 www.biletall.com

Biletal Domestic and Foreign Trade Inc. was founded with the aim of operating in the fields of supplying online excursion tickets and electronic guidance systems in 2006. Working on supplying online excursion tickets, which also constitutes our main area of focus, has started with the Tübitak supported project of National Ticket Supplying System and continued unceasingly to date. Biletall Organization which is the founder of the most common and modern ticket selling and supplying system in Turkey is able to sell and supply tickets of many companies operating at home and abroad in the field of transportation services.

Biletall is in a struggle to develop innovative ways for diversification of its services and remains the leading role in the sector by adding a new one to its rich services every day. Biletall continues to work unceasingly to give you the best quality and most reliable service and to become the only service point where you can meet all of your transportation needs.

Thanks to the rapid growth achieved since the day it was established and sectoral experience, international funds have become the focus of attention. In December 2017, The Abraaj Group invested in our company. thanks to this investment, an Anatolia-based technology company has invested in international fund for the first time. In addition to all these achievements, in 2017 more than 5 million transactions were made over the Biletal.

 www.oplog.com.tr

Founded in 2013, and headquartered in the Bilkent University Cyberpark, OPLOG is a pioneer in the field of e-logistics, simplifying the cost, time and resources needed for global businesse’s supply chain operations. Operating as a high tech fourth party logistics (4PL) integrator, OPLOG is able to help its clients to gain market share by providing a streamlined supply chain management system supported by meticulously executed, warehousing, order fulfillment, last mile delivery and distribution services. Also, OPLOG is the first logistics based company that headquartered in a technopark in Turkey. Harnessing the power of cloud technology, OPLOG is able to bring new efficiency to logistics and supply chain management by introducing revolutionary services, software and operational management systems developed internally.

Oplog’s proprietary technologies can be examined in three different fields;

- OPLOG, has developed its own cloud-based warehouse management system (WMS), a powerful software application that supports the daily operations of its partners, providing centralized management, monitoring and tracking of inventory and stock levels.The OPLOG WMS provides unrivalled logistical support for, planning, staffing and allocation of resources to maximize efficiency.
- OPLOG is developing its own Smart Transportation Robots in order to decrease the order picking cycle time and increase the efficiency throughout the warehouse. All of the technologies are produced in-house by OPLOG Robotics & AI Team.
- OPLOG is actively investing in e-commerce fulfillment and is developing a cloud-based web platform which offers easy-to-buy fulfillment services that is going to be the pioneer in the market. This platform also includes omni-channel retail experience by design.

P.I. Works is inspired by the potential of mobile technologies to transform businesses and improve the lives of mobile subscribers. Our goal is to unlock the full potential mobile networks and enable the hyper-connected world of tomorrow.

P.I. Works provides AI-driven mobile network planning, management and optimization solutions to mobile network operators around the world. Our solutions empower operators to accelerate network transformation, improve network quality and reduce network management costs on the way to 5G. We combine field-proven expertise with our award-winning product portfolio and services. Our technology is powered by advanced AI techniques and automates complex operational and optimization tasks on a 24/7 basis.

P.I. Works has deployed its solutions at 45 mobile network operators in 33 countries. Our strong customer footprint spans North America, Latin America, EMEA and APAC. Some examples include Ooredoo Group, Telefonica Group, Turkcell Group, Turk Telekom, Telkomsel.

P.I. Works was founded in 2005, and it currently has 7 offices around the world: Headquarters in Istanbul, and offices in İzmir, Silicon Valley, Reston, Singapore, London and Bucharest.

P.I. Works contributes actively to the European Telecommunications Standards Institute (ETSI), 3rd Generation Partnership Project (3GPP) standardization forum, and Global TDD initiative (GTI). We also work closely with operators, helping them drive evolution of mobile networks.

 www.sistem9.com

Founded in 2005, Sistem 9 was the first company to bring closed circuit television broadcasting to Turkey. Sistem 9 entered the sector by creating indoor digital channels for advertisers at hair styling salons, and in 2007 it started to provide several places, from banks to cinemas, fast food chains to airlines, and gas stations to communication companies, with Digital Signage Systems services.

Today, Sistem 9 offers special services to over 200 medium and large-scale institutions and has become one of the best of its sector in Turkey and Europe thanks to its managements of over 40,000 screens in 20 different countries. Sistem 9 Medya is the leader in Turkey when it comes to Digital Signage Systems technology and it also has Turkey's broadest, most common, securest, and most functional network.

Sistem 9 is the sole producer of the 'S9Vision Digital Signage' software, which we use in our services. Sistem 9 is the sector's only company providing turn-key services and incorporating every stage, from software to installation, content management to content production, and remote access screen control to on-site technical services.

In addition to providing institutions with special solutions in the field of Digital Signage, today Sistem 9 also serves advertisers with its thousands of indoor and outdoor digital screens.

SMG - music for business

Paycell is a new mobile payment platform established by Turkcell which is the largest telecom operator in Turkey. Paycell provides customers several payment solutions supporting online or physical shopping and bill payment. It serves new-generation solutions for very traditional transactions in a wide range meaning you can buy a song on iTunes via MobilePayment (DCB) or gas from a station without having to leave your car. All payments through Paycell takes only one thing; your mobile number. Operator independent, each individual carrying a mobile phone could benefit all advantages of Paycell.

Turkey is a developing country which has a population around 80 million. Surprisingly, half of the economically eligible population is unbanked. However, each member of this target population has a mobile phone in their pocket and a regular financial relationship with their operator. Paycell aims to integrate unbanked population into the verified economy with its simple and functional payment solutions that are Dijital Para (DigitalMoney), Mobil Ödeme (PaycellTurkcellMobilePayment(DCB)) and Paycell Card. Compared to a bank, it is easier to reach those new- generation services thanks to our large dealer network spreading country wide, and faster that there is no need to struggle with any procedural process and paperwork. Paycell has a vision of creating a cash less society including wide range of consumer profiles.
